

INDEX TO VOLUME 85

AUTHORS

- Aebi, Christian and Grant Cairns, *Morley's Other Miracle*, 205–211
- Alexanderson, Gerald L. and John E. Wetzel, *Perplexities Related to Fourier's 17 Line Problem*, 243–251
- Alsina, Claudi and Roger B. Nelsen, *Proof Without Words: The Triple Angle Sine and Cosine Formulas*, 43
- Ash, J. Marshall, *The Limit Comparison Test Needs Positivity*, 374–375
- Ash, J. Marshall, Allan Berele, and Stefan Catoiu, *Plausible and Genuine Extensions of L'Hospital's Rule*, 52–60
- Aucoin, Karen, *see* Kiltinen, John
- Bailey, Herb and William Gosnell, *Heronian Triangles with Sides in Arithmetic Progression: An Inradius Perspective*, 290–294
- Berele, Allan, *see* Ash, J. Marshall
- Boute, Raymond T., *The Brachistochrone Problem Solved Geometrically: A Very Elementary Approach*, 193–199
- Boyadzhiev, Khristo N., *Close Encounters with the Stirling Numbers of the Second Kind*, 252–266
- Brothers, Harlan J., *Math Bite: Finding e in Pascal's Triangle*, 51
- Brown, Ezra, *see* Rice, Adrian
- Cairns, Grant, *Proof Without Words: $\sqrt{2}$ Is Irrational*, 123
- Cairns, Grant, *see* Aebi, Christian
- Catoiu, Stefan, *see* Ash, J. Marshall
- Chebolu, Sunil K., *What Is Special about the Divisors of 24?* 366–372
- Coleman, Ben and Kevin Hartshorn, *Game, Set, Math*, 83–96
- Daners, Daniel, *A Short Elementary Proof of $\sum 1/k^2 = \pi^2/6$* , 361–364
- Doran, Charles F. and Ursula A. Witcher, *From Polygons to String Theory*, 343–360
- Fetter, Hans L., *A Polyhedron Full of Surprises*, 334–342
- Frederickson, Greg N., *The Proof Is in the Pizza*, 26–33
- Freed-Brown, Julian, Matthew Holden, Michael E. Orrison, and Michael Vrabie, *Cyclotomic Polynomials, Symmetric Polynomials, and a Generalization of Euler's Totient Function*, 44–50
- Freedman, Walden, *Minimizing Areas and Volumes and a Generalized AM-GM Inequality*, 116–123
- Frumosu, Mihail and Alexander Teodorescu-Frumosu, *A Remarkable Combinatorial Identity*, 201–205
- Gilat, David, *Gauss's Lemma and the Irrationality of Roots, Revisited*, 114–116
- Gordon, Russell A., *Properties of Eisenstein Triples*, 12–25
- Gosnell, William, *see* Bailey, Herb
- Gould, Henry and Jocelyn Quaintance, *Double Fun with Double Factorials*, 177–192
- Gupta, Sanjai, Parousia Rockstroh, and Francis Edward Su, *Splitting Fields and Periods of Fibonacci Sequences Modulo Primes*, 130–135
- Hartshorn, Kevin, *see* Coleman, Ben
- Hilton, Peter and Jean Pedersen, *Mathematics, Models, and Magz, Part I: Patterns in Pascal's Triangle and Tetrahedron*, 97–109
- Holden, Matthew, *see* Freed-Brown, Julian
- Jones, Chris, *The New Rules for NFL Overtime*, 277–283
- Kiltinen, John and Karen Aucoin, *My Favorite Rings*, 200
- Kimberling, Clark and Peter Moses, *Inequalities Involving Six Numbers, with Applications to Triangle Geometry*, 221–227
- Kong, David and Peter D. Taylor, *Skunk Redux*, 267–276
- Laosinchai, Parames, *Proof Without Words: Sums of Cubes*, 360
- Miller, Steven J. and David Montague, *Picturing Irrationality*, 110–114
- Montague, David, *see* Miller, Steven J.
- Mortini, Raymond, *A Short Proof of the Chain Rule for Differentiable Mappings in \mathbb{R}^n* , 136–141
- Moses, Peter, *see* Kimberling, Clark
- Muñoz, Vicente, *Integration by Parts without Differentiation*, 211–213

- Murray, Will, *Möbius Polynomials*, 376–383
- Nelsen, Roger B. and Hasan Unal, *Proof Without Words: Runs of Triangular Numbers*, 373
- Nelsen, Roger B., *see also* Alsina, Claudi
- Nganou, Jean B., *How Rare Are Subgroups of Index 2?* 215–220
- Olsson, Jørn B. and James A. Sellers, *Combinatorial Remarks about a "Remarkable Identity"*, 283–288
- Orrison, Michael E., *see* Freed-Brown, Julian
- Oxman, Victor, *Two Cevians Intersecting on an Angle Bisector*, 213–215
- Packard, Erik and Markus Reitenbach, *A Generalization of the Identity $\cos \pi/3 = 1/2$* , 124–125
- Pedersen, Jean, *see* Hilton, Peter
- Propp, James, *A Galois Connection in the Social Network*, 34–36
- Quaintance, Jocelyn, *see* Gould, Henry
- Reitenbach, Markus, *see* Packard, Erik
- Rice, Adrian and Ezra Brown, *Why Ellipses Are Not Elliptic Curves*, 163–176
- Rockstroh, Parousia, *see* Gupta, Sanjai
- Ross, Kenneth A., *First Digits of Squares and Cubes*, 36–42
- Sa'ows, Lee, *On Self-Tiling Tile Sets*, 323–333
- Sandomierski, Frank, *An Elementary Proof of the Two-sidedness of Matrix Inverses*, 289
- Schilling, Mark F., *The Surprising Predictability of Long Runs*, 141–149
- Sellers, James, *see* Olsson, Jørn B.
- Sheard, Michael, *Backwards Induction and a Formula of Ramanujan*, 364–366
- Shelupsky, David, *Letter to the Editor*, 79
- Su, Francis Edward, *see* Gupta, Sanjai
- Swenson, Carl, *see* Yandl, André
- Swetz, Frank J., *Similarity vs. the "In-and-Out Complementary Principle": A Cultural Faux Pas*, 3–11
- Taylor, Peter D., *see* Kong, David
- Teodorescu-Frumosu, Alexander, *see* Frumosu, Mihail
- Tossavainen, Timo, *Letter to the Editor*, 238–239
- Unal, Hasan, *see* Nelsen, Roger B.
- Vrable, Michael, *see* Freed-Brown, Julian
- Wetzel, John E., *see* Alexanderson, Gerald L.
- Whitcher, Ursula A., *see* Doran, Charles F.
- Woeginger, Gerhard J., *Letter to the Editor*, 238
- Wood, William E., *Letter to the Editor*, 79
- Yandl, André L. and Carl Swenson, *A Class of Matrices with Zero Determinant*, 126–130

TITLES

- Backwards Induction and a Formula of Ramanujan*, by Michael Sheard, 364–366
- Brachistochrone Problem Solved Geometrically: A Very Elementary Approach*, The, by Raymond T. Boute, 193–199
- Class of Matrices with Zero Determinant*, A, by André L. Yandl and Carl Swenson, 126–130
- Close Encounters with the Stirling Numbers of the Second Kind*, by Khristo N. Boyadzhiev, 252–266
- Combinatorial Remarks about a "Remarkable Identity"*, by Jørn B. Olsson and James A. Sellers, 283–288
- Cyclotomic Polynomials, Symmetric Polynomials, and a Generalization of Euler's Totient Function*, by Julian Freed-Brown, Matthew Holden, Michael E. Orrison, and Michael Vrable, 44–50
- Double Fun with Double Factorials*, by Henry Gould and Jocelyn Quaintance, 177–192
- Elementary Proof of the Two-sidedness of Matrix Inverses*, An, by Frank Sandomierski, 289
- First Digits of Squares and Cubes*, by Kenneth A. Ross, 36–42
- From Polygons to String Theory*, by Charles F. Doran and Ursula A. Whitcher, 343–360
- Galois Connection in the Social Network*, A, by James Propp, 34–36
- Game, Set, Math*, by Ben Coleman and Kevin Hartshorn, 83–96
- Gauss's Lemma and the Irrationality of Roots*, Revisited, by David Gilat, 114–116
- Generalization of the Identity $\cos \pi/3 = 1/2$* , A, by Erik Packard and Markus Reitenbach, 124–125
- Heronian Triangles with Sides in Arithmetic Progression: An Inradius Perspective*, by Herb Bailey and William Gosnell, 290–294
- How Rare Are Subgroups of Index 2?* by Jean B. Nganou, 215–220
- Inequalities Involving Six Numbers, with Applications to Triangle Geometry*, by Clark Kimberling and Peter Moses, 221–227

- Integration by Parts without Differentiation*, by Vicente Muñoz, 211–213
- Letter to the Editor*, by William E. Wood, 79
- Letter to the Editor*, by Timo Tossavainen, 238–239
- Letter to the Editor*, by Gerhard J. Woeginger, 238
- Letter to the Editor*, by David Shelupsky, 79
- Limit Comparison Test Needs Positivity*, The, by J. Marshall Ash, 374–375
- Möbius Polynomials*, by Will Murray, 376–383
- Math Bite: Finding e in Pascal's Triangle*, by Harlan J. Brothers, 51
- Mathematics, Models, and Magz, Part I: Patterns in Pascal's Triangle and Tetrahedron*, by Peter Hilton and Jean Pedersen, 97–109
- Minimizing Areas and Volumes and a Generalized AM-GM Inequality*, by Walden Freedman, 116–123
- Morley's Other Miracle*, by Christian Aebi and Grant Cairns, 205–211
- My Favorite Rings*, by John Kiltinen and Karen Aucoin, 200
- New Rules for NFL Overtime*, The, by Chris Jones, 277–283
- On Self-Tiling Tile Sets*, by Lee Sallows, 323–333
- Perplexities Related to Fourier's 17 Line Problem*, by Gerald L. Alexanderson and John E. Wetzel, 243–251
- Picturing Irrationality*, by Steven J. Miller and David Montague, 110–114
- Plausible and Genuine Extensions of L'Hospital's Rule*, by J. Marshall Ash, Allan Berele, and Stefan Catoiu, 52–60
- Polyhedron Full of Surprises*, A, by Hans L. Fetter, 334–342
- Proof Is in the Pizza*, The, by Greg N. Frederickson, 26–33
- Proof Without Words: Runs of Triangular Numbers*, by Roger B. Nelsen and Hasan Unal, 373
- Proof Without Words: $\sqrt{2}$ Is Irrational*, by Grant Cairns, 123
- Proof Without Words: Sums of Cubes*, by Parames Laosinchai, 360
- Proof Without Words: The Triple Angle Sine and Cosine Formulas*, by Claudi Alsina and Roger B. Nelsen, 43
- Properties of Eisenstein Triples*, by Russell A. Gordon, 12–25
- Remarkable Combinatorial Identity*, A, by Mihail Frumosu and Alexander Teodorescu-Frumosu, 201–205
- Short Elementary Proof of $\sum 1/k^2 = \pi^2/6$* , A, by Daniel Daners, 361–364
- Short Proof of the Chain Rule for Differentiable Mappings in \mathbb{R}^n* , A, by Raymond Mortini, 136–141
- Similarity vs. the "In-and-Out Complementary Principle": A Cultural Faux Pas*, by Frank J. Swetz, 3–11
- Skunk Redux*, by David Kong and Peter D. Taylor, 267–276
- Splitting Fields and Periods of Fibonacci Sequences Modulo Primes*, by Sanjai Gupta, Parousia Rockstroh, and Francis Edward Su, 130–135
- Surprising Predictability of Long Runs*, The, by Mark F. Schilling, 141–149
- Two Cevians Intersecting on an Angle Bisector*, by Victor Oxman, 213–215
- What Is Special about the Divisors of 24?* by Sunil K. Chebolu, 366–372
- Why Ellipses Are Not Elliptic Curves*, by Adrian Rice and Ezra Brown, 163–176

PROBLEMS

The letters P, Q, and S refer to Proposals, Quickies, and Solutions, respectively; page numbers appear in parentheses. For example, P1888 (62) refers to Proposal 1888, which appears on page 62.

February: P1886–1890; Q1017–1018; S1861–1865

April: P1891–1895; Q1019–1020; S1866–1870

June: P1896–1900; Q1021–1022; S1871–1875

October: P1901–1905; Q1023–1024; S1876–1880

December: P1906–1910; Q1025–1026; S1881–1885

Adelberg, Arnold and Eugene A. Herman, S1867 (153)

Aguado, Alex, P1888 (62)

Aliyev, Yagub N., P1906 (384)

Băţineţu-Giurgiu, D. M. and Neculai Stanciu, P1908 (384)

Baksalary, Oskar Maria and Götz Trenkler, P1904 (296)

Bataille, Michel, P1899 (229), S1882 (387)

Beasley, Brian D., S1872 (231)

- Beatty, Tom and Jodi Gubernat, P1886 (61)
 Bencze, Mihály, P1903 (295)
 Berele, Allan and Jeffrey Bergen, Q1017 (62)
 Bergen, Jeffrey and Allan Berele, Q1017 (62)
 Bojaxhiu, Elton and Enkel Hysnelaj, S1864 (66), S1873 (232)
 Bonomo, John and David Offner, S1868 (154)
 Botsko, Michael W., P1894 (151), Q1019 (151), Q1021 (229), Q1025 (385)
 Bowron, Mark, P1898 (228)
 Burdick, Bruce S., S1881 (386), S1882 (388)
 Burnette, Charles, S1869 (155)
 Calcaterra, Robert, S1865 (67), S1871 (230), S1880 (301)
 Cirulli, Antonello, Matteo Elia, and Cesare Gallozzi, S1877 (298)
 Con Amore Problem Group, S1874 (232)
 Díaz-Barrero, José Luis, P1892 (150)
 Degiorgi, Daniele, S1861 (63)
 Doucette, Robert L., S1878 (299)
 Ecker, Michael W., Q1020 (151)
 Elia, Matteo, Antonello Cirulli, and Cesare Gallozzi, S1877 (298)
 Finch, Steven, P1895 (151)
 Furdui, Ovidiu, P1910 (385)
 Gallozzi, Cesare, Matteo Elia, and Antonello Cirulli, S1877 (298)
 García, Tania Moreno and Pablo Suárez, S1867 (153)
 Geer, Dale, Q1023 (296)
 Gonzales, Luis and Cosmin Pohoata, P1905 (296)
 Gordon, Gary and Peter McGrath, P1889 (62)
 Grossman, Jerrold W., László Lipták, and Mike Shaughnessy, P1893 (150)
 Gubernat, Jodi and Tom Beatty, P1886 (61)
 Hajja, Mowaffaq and Ahmad Hamdan, Q1024 (296)
 Hall, Timothy, P1896 (228)
 Hamdan, Ahmad and Mowaffaq Hajja, Q1024 (296)
 Herman, Eugene A. and Arnold Adelberg, S1867 (153)
 Holland, Finbarr, Q1018 (62)
 Hysnelaj, Enkel and Elton Bojaxhiu, S1864 (66), S1873 (232)
 Iowa State University Undergraduate Problem Solving Group, S1885 (391)
 Just, Erwin, P1890 (62)
 Kariv, Jonathan and David Lonoff, S1875 (234)
 Kouba, Omran, S1862 (64)
 Lampakis, Elias, P1887 (61)
 Leonard, I. E., J. E. Lewis, A. C. F. Liu, and G. Tokarsky, S1866 (151)
 Lewis, J. E., I. E. Leonard, A. C. F. Liu, and G. Tokarsky, S1866 (151)
 Lipták, László, S1884 (390)
 Lipták, László, Jerrold W. Grossman, and Mike Shaughnessy, P1893 (150)
 Liu, A. C. F., I. E. Leonard, J. E. Lewis, and G. Tokarsky, S1866 (151)
 Lonoff, David and Jonathan Kariv, S1875 (234)
 Lopez Aguayo, Daniel, P1907 (384)
 McGrath, Peter and Gary Gordon, P1889 (62)
 Moore, Tom, Q1026 (385)
 Morris, Howard Cary, P1909 (385)
 Northwestern University Math Problem Solving Group, S1876 (296)
 Offner, David and John Bonomo, S1868 (154)
 Oman, Greg, P1900 (229)
 Plaza, Ángel and César Rodríguez, P1901 (295)
 Pohoata, Cosmin and Luis Gonzales, P1905 (296)
 Rodríguez, César and Ángel Plaza, P1901 (295)
 Schlosberg, Joel, S1870 (156)
 ShahAli, H. A., P1897 (228), P1902 (295)
 Shaughnessy, Mike, Jerrold W. Grossman, and László Lipták, P1893 (150)
 Simón, Raúl A., P1891 (150)
 Simoson, Andrew, Q1022 (229)
 Song, Sanghun, S1863 (65)
 Stanciu, Neculai and D. M. Băţineţu-Giurgiu, P1908 (384)
 Suárez, Pablo and Tania Moreno García, S1867 (153)
 Tokarsky, G., I. E. Leonard, J. E. Lewis, and A. C. F. Liu, S1866 (151)
 Trenkler, Götz and Oskar Maria Baksalary, P1904 (296)
 Vowe, Michael, S1878 (299), S1883 (389)
 Zacharias, John, S1879 (299)
